

This innovative product is a mechanical concept with two coupled gears box. The Multi-Gear System operates entirely from the ground, at the front of the trailer. The assembly of this system includes **robust and durable components and is a remarkably efficient and easy to operate product.** This system is highly appreciated by its users. It quickly became the most popular system, with no equivalent on the market. Your tarp will have never been so easy to open.

421 MANUAL MULTI-GEAR BOX SYSTEM DUMP TRAILERS

Like all EICargo's mechanical tarp systems, the 421 can be fitted to almost any open top trailers. It offers the same benefits as all of EICargo's systems: water tightness, the toughness of their anchoring hooks, easy and quick to operate, and most of all, **sizable fuel economy by as much as 14.93%**. Versatile, they can handle any type of bulk transportation including sand, grain, hazmat, etc. EICargo systems protect your cargo from bad weather, while also protecting the environment.

**SIZABLE FUEL ECONOMY
BY AS MUCH AS**
